## Background

Founded in 1973, The Options Clearing Corporation (OCC) is the largest clearing organization in the world for financial derivative instruments. Operating under the jurisdiction of the Securities and Exchange Commission (SEC), OCC is the registered clearing facility for United States listed securities options. OCC issues and clears options on several types of

underlying assets including common stocks, stock indices, currencies and interest rate composites.

OCC's Clearing Membership consists of approximately 140 of the largest U.S. broker/dealers and non-U.S. securities firms. The Participant Exchanges share equal ownership of OCC. This ownership, along with OCC's Clearing Member dominated Board of Directors,

ensures a continuing commitment to servicing the needs of options market participants.

The Intermarket Clearing Corporation (ICC), a wholly-owned subsidiary of OCC, was formed to support Participant Exchanges that were establishing futures markets and to meet the need for a cross-margining mechanism between options and futures.

## Our Mission...

Our industry is undergoing rapid and fundamental changes. Competition is intensifying from traditional and new sources. The regulatory landscape is shifting. Markets are globalizing. For The Options Clearing Corporation, these may result in changes in owners, new alliances and partners, new customers, new products and services and new demands for real-time processing and information flows.

### Our success will be defined by our ability to:

- Consistently deliver and be recognized for delivering the highest levels of clearance and settlement services at a reasonable cost
- Efficiently and successfully perform our risk management obligations
- Continue to provide added value services
- Promote and influence the growth of the markets we serve
- Aggressively and successfully enter new markets in support of our customers

# “Only change is permanent.”

Heraclitus, Greek philosopher

**Around this time** last year, The Options Clearing Corporation (OCC) was celebrating the peaceful advent of a new millennium. It was a quiet conclusion to years of preparation, testing and hard work; but only the beginning of many changes to come.

In 2000, options volume soared in a volatile U.S. stock market. The Internet took center stage as companies rushed to make it a core component of their business models. Competition escalated as new trading platforms entered the marketplace. Decimalization altered the look of stock quotes. Investors actively sought financial information and traded online.

Without a doubt, the evolutionary pace of the

securities industry shifted into high gear in 2000, changing the business landscape. We believe that change provides OCC with an opportunity to make a meaningful contribution to the markets we serve. After all, changes in 2000 contributed to a terrific year for our business, positioning OCC well for the future.

We entered 2000 with record-breaking volume and the momentum continued through year-end. October brought the highest monthly volume in OCC history with 75,309,044 contracts traded. The peak of this activity came on October 20, when an astounding 4,877,338 contracts changed hands. Equity open interest also hit its peak on October 20, standing at 75,661,505 contracts. Total options volume across OCC’s Participant Exchanges reigned high at 726,727,939 contracts, surpassing the 1999 record by 43 percent. Average daily volume reached a record at 2,883,841 contracts, and the Exchanges offered an estimated 2,448 listings.

Due to the high volume, OCC achieved our forecasted annual revenue in September. As a result, we announced substantial discounts on

- Equity
- Index
- Foreign Currency

Clearing Member fees for the last four months of 2000. This was the fourth consecutive year in which we discounted fees for the latter part of the year. This year's fee reductions of up to 41

percent represent our largest discount ever. OCC refunded member firms \$28.2 million in excess clearing fees in 2000, raising the total distributed since 1974 to \$237 million. Net income for 2000 was \$6.1 million, bringing retained earnings to \$31.9 million.

Record options volume, though exhilarating, spurred concerns about system capacity. We are pleased that all OCC systems performed remarkably well. OCC repeatedly conducted high volume tests and upgraded capacity to assure that we are well equipped for whatever volume the market generates.

Technology continues to change the face of our business. And OCC is employing the most advanced technology with the development of ENCORE, our new clearing system. ENCORE is the largest development project ever undertaken by OCC. Installed using a phased approach as individual modules are completed, ENCORE will provide real-time trade information and enhanced communication. A Clearing Member advisory group provides feedback on features of the new system. One such feature is the ability to access ENCORE through our Web site, [optionsclearing.com](http://optionsclearing.com). This year, we upgraded the site with a fresh look, enhanced navigation and

more robust content for our Clearing Members and Participant Exchanges.

In May, the International Securities Exchange (ISE) joined OCC as a Participant Exchange.

It was the first new U.S. options Exchange since 1985. Our advance preparation assured the smooth clearance and settlement of ISE trades.

OCC's expertise is in growing demand as online business to business exchanges begin to trade derivative instruments and otherwise mature. OCC is exploring opportunities in this rapidly growing marketplace. We do not know what these exchanges hold in store for OCC, but we do know that we want to get there before the competition.

OCC also maintained its leadership of the U.S. Securities Markets Coalition (Coalition). This year, the Coalition's primary focus was to work with regulators on U.S. legislation that would permit the trading of single stock futures. Our efforts resulted in a compromise bill that addressed the Coalition's major concerns.

One of the most talked-about issues in 2000

- Equity
- Index
- Foreign Currency
- Interest Rate

was the transition to decimalization. By leveraging the same point-to-point testing process that we used for Y2K, OCC led the options industry through a seamless phase-in of decimal pricing.

We also enhanced our investor education efforts. In July, we established a call center, 1-888-OPTIONS, for individual investors and

- Equity
- Index
- Foreign Currency
- Non-Equity

Members to offset their margin requirements with stock loan positions. Hedge participation increased to 32 firms, a 40 percent increase from 1999. In the same period, daily market value of stock loan/borrow contracts guaranteed by OCC doubled, reaching almost \$5 billion. Overall daily savings attributable to the Hedge program averaged \$237 million.

Another program that advanced in 2000 was our Theoretical Intermarket Margin System (TIMS), the algorithm used to calculate margins at OCC as well as at several international exchanges and clearinghouses. We launched an OCC-TIMS™ pilot for our Clearing Members. This product provides a superior methodology

brokers. And through The Options Industry Council (OIC), we launched a new Web site with online classes, options tools and seminar registration at 888options.com.

While options were surging in popularity here in the U.S., OIC expanded its educational efforts overseas through its London office. We translated selected OIC educational brochures to Spanish and Mandarin in direct response to marketplace needs.

OCC also explored the markets outside of the U.S. by visiting exchanges and firms in the Asia-Pacific region to assess potential business and interest in the options market.

Back in the U.S., we continued to expand our innovative Hedge System, which allows Clearing

for calculating risk in a variety of scenarios, and we are excited at the future prospect of making it available to all Members.

Clearing Members who participate in our cross-margin program continue to realize overall savings. In 2000, the average daily reduction in margin requirements due to cross-margin activity amounted to nearly \$607 million or approximately 40 percent savings per participant. The quality of our system of financial safeguards resulted in the reissuance of the Standard and Poor's Corporation 'AAA' rating for the seventh consecutive year.

This year, OCC spent a great deal of time and resources on workspace expansions and upgrades, including plans for the 2002 move of

our Chicago headquarters. We also replaced a shared disaster recovery facility in Rosemont, Illinois with a fully dedicated site in Chicago. The new facility houses equipment configured to meet OCC's unique needs and allows sole occupancy of the workspace. We continue to maintain a dedicated backup site in North Bergen, New Jersey.

We are proud of our accomplishments in 2000. We recognize that they would not have been possible without the support of our Participant Exchanges, Clearing Members and employees. This support will be even more important in the coming year. We will maintain our solid clearing, settlement and risk management services and our leadership on industry issues. However, these actions alone will not be enough to succeed. We must continue to create innovative products, maximize the benefits of new technologies and examine strategic alliances. There is no doubt that 2001 will be full of changes for OCC. We are eager to find opportunity in each one.

“The most effective way  
to cope with change is  
to help create it.”

L.W. Lynett, American businessman

The Options Clearing Corporation is powerfully positioned for continued success, building upon decades of systems innovation, customer service and risk management. Yet our industry is changing on a daily basis. The evolution to electronic trading environments. A shifting regulatory landscape. Advances in Internet capabilities. An accelerated trend toward globalization. Increasingly savvy investors.

Many would view these changes as stumbling blocks. At OCC, we view them as opportunities.

Opportunities for creating innovative systems and services; forming alliances and partnerships; reaching out to an ever-expanding marketplace; and refining our proven strengths. Our new corporate mission and strategic initiatives reflect our intent to seize the opportunities that arise in a dynamic business environment. Bold, new ideas are fostered by change. And by meeting today's challenges, tomorrow is ours.

The image features a teal background with large, flowing lime green shapes that resemble stylized letters or organic forms. A white circle is positioned in the upper right quadrant, containing the text "Seeing change as opportunity". Two thin white lines intersect at the center of the circle, forming an 'X' shape that extends across the page.

**Seeing** change as opportunity

*Ahead of the curve*

“The rung of a ladder was never meant  
to rest upon, but only to hold a man’s foot  
long enough to enable him  
to put the other somewhat higher.”

Thomas H. Huxley, English biologist and educator

**Paramount to** meeting the challenges of an advancing marketplace is OCC’s ability to innovate. We realize that it is not enough to deliver quality and timely clearing and settlement; we must be a first mover in developing new systems and services while creating market efficiencies. Our innovation in risk management remains among our most distinguished achievements. We continually examine our risk management methodologies to support capital optimization and provide financial flexibility for market participants without compromising our guarantee. We have created a linkage with The Depository Trust & Clearing Corporation which will reduce collateral inefficiencies and systemic risk originating from the settlement of stock option assignments. And in cooperation with our Participant Exchanges, Clearing Members and other industry representatives, we are developing a portfolio margin system for qualifying customer accounts. From the risk-based analysis underlying our Theoretical Inter-market Margin System (TIMS), to cross-margining

between options and futures markets, to our stock loan Hedge System, OCC has emerged as the world’s preeminent risk management organization.

OCC is continuing this tradition of innovation by replacing our existing clearing system with ENCORE, a Windows-based system that will offer Clearing Members “anytime, anywhere” access to options information. ENCORE will feature robust, real-time capabilities for trade and position processing. Additionally, Clearing Members will have the flexibility of linking to OCC via several communication vehicles, ranging from current dial-up and leased line methods to a secure Internet link. Combined, these features will provide OCC’s Membership and Participant Exchanges with a single point of entry to both clearing and industry information as it becomes available – paving the way for multiple processing cycles and complex new products.

“We cannot become what we  
need to be by remaining  
what we are.”

Max DePree, American author

OCC is always looking forward. Having already established a presence on the World Wide Web with [optionsclearing.com](http://optionsclearing.com), OCC is cultivating the Internet as a core business component. MyOCC, a secure portal within our Web site, will enable Clearing Members and Participant Exchanges to customize proprietary options information and trade data. Expanded content and one-click access to all of the site's features further underscore OCC's commitment to harness the speed and flexibility of the Internet.

In this age of rapid technological gains, information dissemination is emerging as a key competitive differentiator. Timeliness is essential, and OCC is embracing the next generation of communication technology by tapping into optical communication networks. Fiber optics, the most advanced network technology available, will be dramatically more efficient and have far greater capacity than traditional methods of transmitting data. The opportunity to utilize this technology will provide OCC with the experience to implement

future optical connections with our Clearing Members, decreasing transmission time to a mere fraction of what it is now.

Every aspect of the marketplace, it seems, is on the move and gaining speed. The Internet has created a new forum for buyers and sellers to meet, and as a result, we are witnessing an explosion of online business to business exchanges. Everyone is scrambling to get a piece of the “B2B” pie. Already a solid business to business company, OCC intends to explore those opportunities that will optimize the value of our core capabilities. Entering into coactive relationships with complementary organizations will create new challenges, including the seamless combining of systems and the division of responsibilities. OCC realizes that choosing the right partners is critical. By seeking out synergistic relationships, we will be able to diversify our strengths and build up previously untapped customer bases while offering more choices in the marketplace.

**Thinking** outside of the box

*Spreading the word*

“The world is  
advancing.  
Advance with it.”

Giuseppe Mazzini, Italian revolutionist

**Technological changes** in the industry also influence the way investors do business. Information is more readily available than ever. Investors have a wide selection of resources from which to choose. As product awareness increases, so does options volume and the demand for more sophisticated training. OCC and its Participant Exchanges have responded wholeheartedly by spearheading The Options Industry Council (OIC) to educate investors regarding the responsible use of equity options.

OIC's comprehensive educational program is geared toward the individual investor and includes seminars, videotapes, options software, a broker outreach program and an interactive Web site. Since OIC's inception in 1992, equity options volume has risen an astounding 535 percent. This year alone, over 85,000 investors and brokers have responded to OIC's educational offerings, evidencing the effectiveness of its programs. OIC will also continue to broaden its reach internationally through its London office.

Increased visibility is central to OCC's success at home and abroad. We plan to enhance our own marketing efforts to expand business opportunities with existing and potential customers. Industry education will continue to be an important means by which OCC promotes its value to the marketplace, from our Investor Call Center to our participation in international derivatives conferences.

OCC has long known that keeping regulators and legislators abreast of industry concerns ultimately benefits the options marketplace as a whole. We have been influential as a liaison to the Securities Industry Association's Options Committee and as the coordinator of the U.S. Securities Markets Coalition. Through meetings, correspondence and written testimony, OCC diligently works to inform and educate lawmakers about the potential effects of pending legislation.

“You can’t build up  
a reputation on what you  
are going to do.”

Henry Ford, American industrialist

Yes, tomorrow’s opportunities belong to OCC. But it takes a strong hand to grasp the future. Since 1973, the options industry has recognized OCC as a stalwart protector of market integrity. Our Members rely on OCC for quality and timely clearing and settlement services. Our ability to manage counterparty credit risk is backed by a multi-tiered network of financial safeguards and has resulted in our consistent ‘AAA’ credit rating from Standard & Poor’s Corporation. Our processing systems have always utilized leading edge technology. Our motivated employees are dedicated to

ongoing training to keep pace with the evolving needs of our Membership. These enduring strengths form the foundation on which OCC will meet our future – developing innovative systems and services, forging synergistic relationships and reaching out to increasingly sophisticated market participants.

Change affords opportunity. By applying our proven strengths and taking on new initiatives, we will turn today’s challenges into tomorrow’s successes.

# Notes to the Consolidated Financial Statements

## The Options Clearing Corporation and Subsidiaries

Years ended December 31, 2000, 1999 and 1998

### **Note 1.**

#### **Summary of Significant Accounting Policies**

**Basis of Presentation** The consolidated financial statements include the accounts of the Options Clearing Corporation (“OCC”) and its wholly owned subsidiaries, the Intermarket Clearing Corporation (“ICC”) and International Clearing Systems, Inc. (“ICSI”). All intercompany balances and transactions have been eliminated in consolidation. References to the “Clearing Corporation” will include both OCC and its subsidiaries, as applicable.

**Use of Estimates** The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

**Cash and Cash Equivalents** Cash and cash equivalents are comprised primarily of United States Government securities held under agreements issued by major banking institutions, which mature on the next business day. During the term of the agreements, the underlying securities are transferred through the Federal Reserve System to a custodial account maintained by the issuing bank for the benefit of the Clearing Corporation. The Clearing Corporation considers all highly liquid debt instruments with a maturity of three months or less from the date of purchase to be cash equivalents.

**Property and Equipment** Property and equipment are stated at historical cost, net of accumulated depreciation. Depreciation is computed using straight-line and accelerated methods based on estimated useful lives of five to twenty years. Leasehold improvements are amortized over the terms of the related leases. Software is amortized over a useful life of three to five years.

Effective January 1, 1999, OCC adopted Statement of Position (“SOP”) 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*. SOP 98-1 requires capitalization of certain costs

incurred in the development of internal use computer software. The effect of adopting SOP 98-1 was to capitalize costs for computer software development which otherwise would have been expensed in the amount of \$15.9 million and \$0 for the years ended December 31, 2000 and 1999, respectively.

**Impairment of Long-Lived Assets** The Clearing Corporation reviews long-lived assets for possible impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If such review indicates that the carrying amount of a long-lived asset is not recoverable, the carrying amount is reduced to the estimated recoverable value.

**Income Taxes** The Clearing Corporation uses the asset and liability method, under which deferred tax assets and liabilities are recorded based on differences between the financial accounting and tax basis of assets and liabilities. Deferred tax assets and liabilities are measured based on the currently enacted tax rate expected to apply to taxable income in the year in which the deferred tax asset or liability is expected to be settled or realized.

**Earnings Per Share** Earnings per share are calculated based on the weighted average number of Class B common shares outstanding during the year; 23,032 shares in 2000, 20,000 shares in 1999, and 20,000 shares in 1998. The Clearing Corporation has no dilutive common shares outstanding.

**Reclassifications** Certain prior years’ amounts have been reclassified to conform with the current year presentations.

**Recent Accounting Pronouncements** In 1998, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (“SFAS”) No. 133, *Accounting for Derivative Instruments and Hedging Activities*. SFAS No. 133, as amended, establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. Additionally, SFAS No. 133 requires changes in the fair market value of derivatives to be recorded each period in current earnings or shareholders’ equity, depending on the intended use of the derivatives. In January, 2001

the Clearing Corporation adopted the provisions of SFAS No. 133. No transition adjustment was required.

### **Note 2.**

#### **Off-Balance-Sheet Risk, Concentration of Credit Risk and Fair Value of Financial Instruments**

OCC is the registered clearing agency for U.S. listed securities options. OCC issues (and in that sense guarantees) and clears option contracts traded on its Participant Exchanges. OCC clears options on several types of underlying interests, including common and preferred stocks, foreign currency, stock indexes, American depository receipts and interest rate composites. OCC also is the clearing agency for exercises of foreign currency options and stock index options. OCC maintains lines of credit with major domestic and foreign banks in the amount of approximately \$982 million as of December 31, 2000 (foreign currency denominated lines of credit are converted to U.S. dollars using the year-end exchange rate). Of these lines of credit, \$812 million is available to ensure the performance of the foreign currency settlement process in the event that a Clearing Member should fail to deliver foreign currencies on a timely basis; \$150 million is available to enable OCC to meet any suspension obligations or to reimburse itself for bankruptcy losses; and \$20 million is available to meet working capital requirements incurred in the ordinary course of business. Commitment fees are paid to the issuing banks for these lines of credit.

ICC clears, settles and guarantees futures contracts and options on futures contracts executed on its Participant Exchanges. OCC and ICC perform a guarantee function which ensures the financial integrity of the markets they clear. Consequently, OCC and ICC bear counterparty credit risk in the event that future market movements create conditions which could lead to Clearing Members failing to meet their obligations to OCC or ICC. OCC and ICC are, thus, exposed to off-balance-sheet risk with respect to the securities broker dealers and futures commission merchants that are their respective Clearing Members.

# Notes to the Consolidated Financial Statements

## The Options Clearing Corporation and Subsidiaries

OCC and ICC reduce their exposure through a risk management program that strives to achieve a prudent balance between market integrity and liquidity. This program of safeguards, which provides substance to OCC's guarantee, consists of: rigorous initial and ongoing financial responsibility standards for membership; margin deposits (see Note 3); and clearing fund deposits (see Note 4).

The carrying value of the Clearing Corporation's cash equivalents approximates fair value because of the short maturities of those investments. Margin deposits (see Note 3) and clearing fund deposits (see Note 4) are presented at market value at December 31, 2000, in accordance with the rules of the Clearing Corporation.

Neither OCC nor ICC assumes any guarantor role unless it has a precisely equal, and offsetting, claim against another Clearing Member. Therefore, the fair value of the open interest of options, futures and options on futures contracts cleared and settled by OCC and ICC is not included in the statements of consolidated financial condition. It should be noted that ICC had no open interest at December 31, 2000.

### Note 3. Margin Deposits

The rules and practices established by OCC provide that each Clearing Member representing the writer of an option must either deposit the underlying interest or maintain specified margin deposits in the form of cash, bank letters of credit, Government securities (as defined in the By-laws) or other acceptable margin securities ("valued securities"). The margin deposits of each Clearing Member are available to meet only the financial obligations of that Clearing Member to OCC. All margin deposits, except letters of credit, are held at securities depositories or banks. All obligations and noncash margin deposits are marked to market on a daily basis. OCC also haircuts, on a daily basis, the value of equity securities and Government securities with more than one year to maturity in order to provide a cushion against price fluctuations. Valued securities are given margin credit at 70% of the daily closing price. The margin credit granted for the

securities of any one issuer cannot exceed 10% of a Clearing Member's daily margin requirement.

The rules of ICC provide that each Clearing Member, with respect to each option on futures contract for which it represents the writer, and with respect to each futures contract, is required to deposit and maintain specified margin in the form of cash, Government securities, or bank letters of credit.

Under the rules of OCC and ICC, bank letters of credit are required to be irrevocable. Cash margin deposits which are held may be invested, and any interest or gain received or loss incurred on invested funds accrues to OCC and ICC. OCC's and ICC's margin deposits are not included in the statements of consolidated financial condition.

The values of underlying securities and margin deposits at December 31, 2000 for the Clearing Corporation were approximately as follows (foreign government securities are converted to U.S. dollars using the year-end exchange rate):

Underlying securities at market value .....	\$ 8,717,763,000
Valued securities at market value .....	33,548,630,000
Cash and temporary investments .....	89,071,000
Bank letters of credit .....	3,611,083,000
Government securities deposited as margin (at market value at date of deposit, which approximates market value at December 31, 2000)	5,676,599,000
<b>Total</b>	<b>\$ 51,643,146,000</b>

Further, as of December 31, 2000, OCC had on deposit Index Option Escrow Receipts which represent acceptable collateral on deposit with approved banks which OCC has accepted in lieu of margin for approximately 16,000 short index contracts. At December 31, 2000, the market value of the index option contracts collateralized under the escrow receipts program approximated \$2 billion.

OCC also maintains cross-margining arrangements with certain U.S. commodities clearing organizations, including ICC. Under the terms of these arrangements, an OCC Clearing Member that is also a Clearing Member of one or more commodities clearing organiza-

tions participating in the cross-margining arrangement, or that has an affiliate that is a Clearing Member of one or more such commodities clearing organizations, may maintain cross-margin accounts in which the Clearing Member's positions in OCC-cleared options are combined, for purposes of calculating margin requirements, with positions of the Clearing Member (or its affiliate) in futures contracts and/or options on futures contracts. Margin deposits on the combined positions are held jointly by OCC and the participating commodities clearing organization(s) and are available (together with any proceeds of the options and futures positions themselves) to meet financial obligations of the Clearing Member(s) to OCC and the commodities clearing organization(s). In the event that either OCC or one or more participating commodities clearing organization(s) suffers a loss in liquidating positions in a cross-margin account, the loss is to be shared among OCC and the participating commodities clearing organization(s) in accordance with their agreement. Margin deposits in respect of cross-margin accounts may be in the form of cash, valued securities, Government securities or bank letters of credit.

### Note 4. Clearing Fund Deposits

OCC and ICC maintain separate clearing funds to cover possible losses should a Clearing Member, bank, or a securities or commodities clearing organization default. The OCC clearing fund is available only to OCC, and the ICC clearing fund is available only to ICC. A Clearing Member's clearing fund deposit is based on its pro-rata share of options, futures or options on futures activity which is recomputed monthly. Therefore, the OCC and ICC clearing funds expand and contract in size in relation to activity in their respective markets. The OCC and ICC clearing funds mutualize the risk of default among all Clearing Members. The entire clearing fund is available to cover potential losses in the event that the margin deposit and the clearing fund deposit of a defaulting Member are inadequate or not immediately available to fulfill that Member's outstanding financial obligations. In the event of a default, OCC and ICC are required, in the

case of an exercise of a call option, to sell, and in the case of an exercise of a put option, to buy, the underlying interest covered by the option at the stated exercise price. In addition, in the event a futures contract or an option on futures contract remains open after the close of business on the last day of trading, ICC is required to purchase the commodity underlying the contract from the seller of the contract and to sell the commodity underlying the contract to the purchaser. The OCC and ICC clearing funds are available to cover the cost of liquidating a defaulting Clearing Member's open positions or performing OCC's or ICC's obligations in respect of positions not yet liquidated.

Clearing fund deposits must be in the form of cash or Government securities (as defined in the By-laws), as the clearing funds are intended to provide OCC or ICC with an immediately available pool of liquid assets. Clearing Members may make clearing fund deposits in cash to OCC or ICC or in an approved segregated funds account, or in Government securities to various securities depositories or banks. Cash deposits in nonsegregated accounts may be invested and any interest or gain received or loss incurred on invested funds accrues to OCC or ICC. Cash in a segregated account is a demand deposit which is held in the name of OCC or ICC, which names an individual Clearing Member whose clearing fund obligation the deposit represents and which can only be withdrawn by OCC or ICC. These segregated funds cannot be invested by OCC or ICC. Clearing fund cash and securities deposits are included in the statements of consolidated financial condition. The total amount of the clearing funds (all foreign government securities are converted to U.S. dollars using the year-end exchange rate) at December 31, 2000 was as follows:

Cash and temporary investments.....	\$ 26,909,000
Segregated funds accounts.....	118,825,000
Government securities, at market value	1,568,292,000
<b>Total</b>	<b>\$ 1,714,026,000</b>

The clearing funds maintained by OCC and ICC were \$1,713,727,000 and \$299,000, respectively.

**Note 5.  
Common Stock, Stockholders Agreement and Agreements with Participant Exchanges**

OCC has Class A and Class B common stock, each with \$10 par value, 60,000 shares authorized, 30,000 shares issued and 25,000 shares outstanding at December 31, 2000, and 20,000 shares outstanding, at December 31, 1999.

On May 23, 2000 the International Securities Exchange LLC became a participant in the Clearing Corporation by purchasing 5,000 shares of class A common stock and 5,000 shares of class B common stock for \$1,000,000. The shares purchased by the International Securities Exchange LLC were previously held as treasury stock, purchased by OCC at a cost of \$333,333. The difference between the purchase price and the cost of the treasury stock was credited to paid in capital.

Treasury stock comprises 5,000 shares of Class A common stock and 5,000 shares of Class B common stock at a cost of \$333,333.

The Class B common stock is issuable in twelve series of 5,000 shares each. The Class B common stock is entitled to receive dividends whereas the Class A common stock is not. Upon liquidation of OCC, holders of Class A common stock and Class B common stock would first be paid the par value of their shares. Next, each holder of Class B common stock would receive a distribution of \$1,000,000. Next, an amount equal to OCC's shareholders' equity at December 31, 1998 of \$22,902,094, minus the distributions described above, would be distributed to those holders who acquired their Class B common stock before December 31, 1998. Finally, any remaining shareholders' equity would be distributed equally to all holders of Class B common stock.

The By-laws of OCC provide that any national securities exchange or national securities association which meets specific requirements may become a participant by acquiring 5,000 shares of Class A common stock and 5,000 shares of Class B common stock.

The purchase price for such shares will be the aggregate book value of a comparable number of shares at the end of the preceding calendar month, but not more than \$1,000,000.

OCC is a party to a Stockholders Agreement and a Restated Participant Exchange Agreement with its shareholders.

The Stockholders Agreement provides that each stockholder appoints the members of the Nominating Committee of OCC as its proxy for purposes of voting its shares for the election of member directors, the Chairman of OCC as the management director, the person(s) nominated by the Chairman of OCC with the approval of the Board of Directors as the public director(s), and members of the following year's Nominating Committee. It also provides for the purchase by OCC of all of its stock owned by any stockholder under specified circumstances, but the obligation to pay the purchase price will be subordinated to OCC's obligations to creditors and the purchase price cannot be paid if the payment would reduce capital and surplus below \$1,000,000. If OCC is required to purchase its stock from any stockholder, the purchase price for the two years following the date the stockholder acquired its stock is the stockholder's purchase price paid reduced by \$300,000 and, thereafter, the purchase price at the date of purchase is the lesser of the aggregate book value of the shares or the original purchase price paid less \$240,000, \$180,000, \$120,000, \$60,000 or zero after the second, third, fourth, fifth or sixth year, respectively, from the date of sale of such stock.

The Restated Participant Exchange Agreement deals with the business relationship between and among OCC and each participant securities exchange and securities association. Likewise, ICC is a party to a Participant Exchange Agreement with its participant futures exchanges ("participant" or "participants"), which deals with the business relationship between and among ICC and each participant and among such participants.

**Note 6.  
Sale and Buy Back Agreements**

Sale and Buy Back agreements outstanding, including amounts in margin and clearing fund deposits, averaged \$153 million and \$162 million during 2000 and 1999, respectively, and the maximum amount outstanding during 2000 and 1999 was \$320 million and \$399 million,

# Notes to the Consolidated Financial Statements

## The Options Clearing Corporation and Subsidiaries

respectively. The amounts outstanding approximate the market value of the underlying securities.

### Note 7. Clearing Fees

The Boards of Directors set clearing fees and determine the amounts of refunds and discounts, if any, based upon the current needs of OCC and ICC. The Boards of Directors have determined in the years ended December 31, 2000, 1999 and 1998 that refunds and discounts of clearing fees be made to Clearing Members. Such refunds and discounts, which have been netted against clearing fees in the statements of consolidated income and retained earnings, amounted to \$43,372,000, \$21,566,000 and \$13,786,000 for the years ended December 31, 2000, 1999 and 1998, respectively.

### Note 8. Commitments

Future minimum rental payments under non-cancelable operating leases (principally for office space and data processing equipment) in the aggregate in effect as of December 31, 2000 are as follows:

2001 .....	\$ 5,505,000
2002 .....	5,121,000
2003 .....	3,406,000
2004 .....	2,467,000
Thereafter	24,108,000
<b>Total</b>	<b>\$ 40,607,000</b>

Rental expense for the years ended December 31, 2000, 1999 and 1998 amounted to \$12,453,000, \$11,344,000 and \$11,558,000, respectively. Included in rental expense for 1998 is a \$680,000 charge for vacating certain office space. The payments in the table above include rent for new office space.

Rental income received under subleases for the years ended December 31, 2000, 1999 and 1998 amounted to \$0, \$446,000 and \$347,000, respectively.

The Clearing Corporation has employment agreements with certain of its senior officers. The aggregate commitment for future salaries at December 31, 2000, excluding bonuses, was approximately \$1.4 million.

### Note 9. Related Party Transactions

Certain exchanges and their affiliates provide some operational and other services on behalf of OCC for which expenses of approximately \$184,000, \$109,000 and \$115,000 were incurred for the years ended December 31, 2000, 1999, and 1998, respectively.

OCC also bills and collects transaction fees for the Chicago Board Options Exchange, Incorporated and the International Securities Exchange LLC. Fees billed and uncollected at December 31, 2000 and 1999 were \$17,079,000 and \$13,104,000, respectively, and are included in the statements of consolidated financial condition as Exchange billing receivable and payable.

In 1992, OCC entered into a joint marketing effort with its Participant Exchanges to form The Options Industry Council ("OIC"). The total amounts expended by OCC on behalf of OIC for the years ended December 31, 2000, 1999 and 1998 were \$4,100,000, \$4,280,000 and \$3,299,000, respectively. The Participant Exchanges' share of OIC expenditures for the years ended December 31, 2000, 1999 and 1998 was \$1,900,000, \$2,179,000 and \$1,678,000, respectively. At December 31, 2000 and 1999, the amounts due from Participant Exchanges were \$1,854,000 and \$1,665,000, respectively.

Transactions between OCC and shareholder exchanges and their affiliates are settled by cash payments.

### Note 10. Income Taxes

The provision for income taxes is reconciled to amounts determined by applying the statutory federal income tax rate as follows:

Years ended December 31	2000	1999	1998
Federal income tax at the statutory rates	\$ 3,651,461	\$ 2,501,162	\$ 2,588,278
Permanent tax differences .....	102,668	97,080	107,166
State income tax effect	558,524	386,024	400,466
Other	—	—	19,698
<b>Provision for income taxes</b>	<b>\$ 4,312,653</b>	<b>\$ 2,984,266</b>	<b>\$ 3,115,608</b>

The deferred tax asset (liability) consists of the following:

December 31	2000	1999
Compensation and employee benefits .....	\$ 1,719,909	\$ 1,268,793
Other items	—	108,660
Current asset	1,719,909	1,377,453
Accelerated depreciation .....	(5,325,856)	976,367
Other items	1,195,950	—
Long-term asset (liability)	(4,129,906)	976,367
<b>Total</b>	<b>\$(2,409,997)</b>	<b>\$ 2,353,820</b>

### Note 11. Retirement Plans

The Clearing Corporation has a trustee, non-contributory, qualified retirement plan covering employees who meet specified age and service requirements. Retirement benefits are primarily a function of both years of service and the level of compensation during the highest consecutive five years out of the last ten years before retirement.

The Clearing Corporation also has a funded supplemental executive retirement plan ("SERP"). Retirement benefits are primarily a function of both years of service and the level of compensation during the highest nonconsecutive three years out of the last ten years before retirement. Effective January 1, 1998, the SERP was amended to include a benefit replacement plan ("BRP") feature for certain employees whose qualified retirement plan benefits are limited by maximum pay and maximum benefit limitations.

The Clearing Corporation's funding policies, subject to the minimum funding requirements of U.S. employee benefit and tax laws, are to contribute such amounts as are determined on an actuarial basis to provide the plans with assets sufficient to meet the benefit obligation of the plans.

Net periodic benefit cost consisted of the following:

Years ended December 31	2000	1999	1998
Service cost .....	\$ 1,175,000	\$ 1,225,000	\$ 983,000
Interest cost .....	2,327,000	1,939,000	1,603,000
Expected return on assets .....	(2,915,000)	(2,227,000)	(2,002,000)
Amortization:			
Transition obligation	17,000	17,000	17,000
Prior service cost .....	109,000	38,000	217,000
Actuarial (gain)/loss	119,000	542,000	(2,000)
Net periodic benefit cost	\$ 832,000	\$ 1,534,000	\$ 816,000

Assets and liabilities for the Retirement Plan and the SERP/BRP were measured as of September 30, 2000. The funded status as of December 31, 2000 is the same as the funded status as of September 30, 2000.

The plans' benefit obligation, plan assets and funded status are as follows:

Years ended December 31	2000	1999
Change in Benefit Obligation:		
Net benefit obligation at		
beginning of year .....	\$ 29,146,000	\$ 26,614,000
Service cost .....	1,175,000	1,225,000
Interest cost .....	2,327,000	1,939,000
Plan amendments .....	(121,000)	584,000
Actuarial (gain)/loss .....	2,187,000	(759,000)
Gross benefits paid	(482,000)	(457,000)
Net benefit obligation at end of year	\$ 34,232,000	\$ 29,146,000

Change in Plan Assets:		
Fair value of plan assets		
at beginning of year .....	\$ 29,575,000	\$ 22,030,000
Actual return on plan assets .....	3,225,000	3,654,000
Employer contributions .....	(7,898,000)	4,348,000
Gross benefits paid	(482,000)	(457,000)
Fair value of plan assets at end of year	\$ 24,420,000	\$ 29,575,000

Funded Status:		
Funded status at end of year .....	\$ (9,812,000)	\$ 429,000
Unrecognized net actuarial loss .....	4,540,000	4,149,000
Unrecognized prior service cost .....	566,000	796,000
Unrecognized net transition obligation .....	15,000	32,000
Fourth quarter contributions	454,000	1,000,000
Net amount recognized – (accrued) prepaid	\$ (4,237,000)	\$ 6,406,000

Amounts recognized in the statements of consolidated financial condition consist of:		
Prepaid benefit cost .....	\$ 5,056,000	\$ 6,406,000
Accrued benefit liability .....	(12,600,000)	—
Intangible asset .....	891,000	—
Accumulated other comprehensive (income) loss	2,416,000	—
Net amount recognized – (accrued) prepaid	\$ (4,237,000)	\$ 6,406,000

The accumulated benefit obligation and fair value of plan assets for the pension plan with accumulated benefit obligations in excess of plan assets was \$12,553,000 and \$9,517,000, as of December 31, 2000 and December 31, 1999, respectively.

The major assumptions used to determine the obligations are a 7.75% discount rate and 4.75% future salary increases as of September 30, 2000 and September 30, 1999. The expected long-term return on assets was 9.5% for both 2000 and 1999.

The Clearing Corporation also maintains a defined contribution plan qualified under Internal Revenue Code Section 401(k) for eligible employees who elect to participate in the plan. Eligible employees may elect to have their salaries reduced by a percentage. This amount is then paid into the plan by the Clearing Corporation on behalf of the employee.

The Clearing Corporation will make matching contributions to the participant's account subject to certain limitations. The Clearing Corporation's expenses for the matching contributions to the plan for the years ended December 31, 2000, 1999 and 1998 were \$636,000, \$593,000 and \$469,000, respectively.

#### **Note 12. Postretirement Benefits Other Than Pensions**

The Clearing Corporation has a Postretirement Welfare Plan covering employees who meet specified age and service requirements. Retiree contributions to medical payments vary by age and service at retirement. The plan is a defined dollar benefit plan in which the Clearing Corporation's obligation is limited to a maximum amount per participant set by the Clearing Corporation at the time a participant retires. Effective January 1, 1998, the plan established a 401(h) account to fund retiree welfare benefits. Benefits for all participants, excluding key employees, will be funded through the 401(h) account, to the extent allowed under the regulations.

# Notes to the Consolidated Financial Statements

## The Options Clearing Corporation and Subsidiaries

Net periodic benefit cost consisted of the following:

Years ended December 31	2000	1999	1998
Service cost	\$ 127,000	\$ 170,000	\$ 46,000
Interest cost	205,000	187,000	68,000
Expected return on assets	(37,000)	(13,000)	—
Amortization:			
Transition obligation	28,000	28,000	28,000
Prior service cost	144,000	144,000	—
Actuarial (gain) loss	(3,000)	—	—
Total net periodic benefit cost	\$ 464,000	\$ 516,000	\$ 142,000

Assets and liabilities for the postretirement benefit plan were measured as of September 30, 2000. The funded status as of December 31, 2000 is the same as the funded status as of September 30, 2000.

The plans' benefit obligation, plan assets and funded status are as follows:

Years ended December 31	2000	1999
Change in Benefit Obligation:		
Net benefit obligation at beginning of year	\$ 2,549,000	\$ 2,220,000
Service cost	127,000	170,000
Interest cost	205,000	187,000
Plan amendments	—	407,000
Actuarial (gain)/loss	(114,000)	(367,000)
Gross benefits paid	(74,000)	(68,000)
Net benefit obligation at end of year	\$ 2,693,000	\$ 2,549,000

Years ended December 31	2000	1999
Change in Plan Assets:		
Fair value of plan assets at beginning of year	\$ 227,000	\$ —
Actual return on plan assets	37,000	17,000
Employer contributions	297,000	278,000
Gross benefits paid	(74,000)	(68,000)
Fair value of plan assets at end of year	\$ 487,000	\$ 227,000

Funded Status:		
Funded status at end of year	\$ (2,206,000)	\$ (2,322,000)
Unrecognized net actuarial (gain)/loss	(414,000)	(298,000)
Unrecognized prior service cost	1,244,000	1,388,000
Unrecognized net transition obligation	337,000	365,000
Fourth quarter contributions	285,000	236,000
Net amount recognized – accrued	\$ (754,000)	\$ (631,000)

Amount recognized in the statements of consolidated financial condition consist of:		
Accrued benefit liability	\$ (754,000)	\$ (631,000)

The assumed discount rate used in determining the accumulated postretirement benefit obligation was 7.75% in 2000 and 7.75% in 1999.

The assumed health care cost trend rate used in measuring the accumulated postretirement benefit was 5% in 2000 decreasing by one percentage point per year until 2001.

A one percentage point increase in the assumed health care cost trend rate for each year would not have a material effect on the accumulated postretirement benefit obligation or net postretirement health care cost.

### Note 13. Contingencies

In the normal course of business, the Clearing Corporation may be subjected to various lawsuits and claims. At December 31, 2000, no litigation exists which management of the Clearing Corporation believes would have a material adverse effect on the consolidated financial statements of the Clearing Corporation.

# Independent Auditors' Report

## The Options Clearing Corporation and Subsidiaries

We have audited the accompanying statements of consolidated financial condition of The Options Clearing Corporation and Subsidiaries (the "Corporation") as of December 31, 2000 and 1999 and the related statements of consolidated income and retained earnings, consolidated comprehensive income and of consolidated cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures

in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Corporation at December 31, 2000 and 1999 and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2000 in conformity with accounting principles generally accepted in the United States of America.
